SimaPro Business user package

SimaPro Business user package is designed to make your data collection more efficient and enable you to view, compare and share results. You don't need access to SimaPro software – an LCA practitioner can set up a model for you. With Business user, you get direct access to the expertise through your model. Skip a big part of the learning curve and start delivering LCA results right away. Visit simapro.com to compare different packages.

Add-ons

Features & price

Quick and easy

Instead of going through full LCA reports, now you can directly access scenario projects and zoom into the hotspots of the product. Collect and Share tools have a user-friendly interface that makes LCA results accessible and actionable. They run on an interactive web platform, allowing you to quickly share results or easily collect accurate data. With SimaPro Share, business stakeholders can make changes to a product life cycle and quickly understand the impact of their choices.

Increased efficiency

The Collect and Share tools reduce your workload and save time, improving collaboration among departments and with suppliers. SimaPro Share provides real-time information and removes the need for back-and-forth reports and custom Excel tools. SimaPro Collect makes it easy to do surveys and monitor progress. Everything is accessible in one web-based platform. Now you can step away from Excel at last.

Reliable insights

Collect and Share tap into SimaPro for a robust LCA model and databases. The scenarios are based on methodological choices of the LCA expert, so they remain reliable even if the expert tweaks them. With this solid basis in fact-based LCA, the Collect and Share tools can really help your company make more sustainable decisions. PRé has been certified for ISO 27001 (information security) for Collect and Share.

Make your collaboration efficient

Collect

Optimized data collection

Optimize data collection from stakeholders and suppliers and monitor your data collection progress. SimaPro Collect has a user-friendly dashboard that contains standard survey templates, that are easy to fill out. You can also customize the templates to create new surveys. Everything is accessible in one web-based platform, which makes it easy to track the status of your survey.

Share

Sharing scenarios with anyone

Create product scenarios and share them with anyone you want, even if they don't have access to SimaPro. SimaPro Share allows to interactively evaluate 'what if' scenarios and experience the impact of their decisions first-hand. This streamlines business applications such as product design, EPDs and ISO-compliant studies. You'll no longer have to recalculate results for each question, and you help ensure that your sustainability insights will be used to drive change.
